

## COLORTEC 600WB

ColorTec 600WB combines the industry's highest grade of alkaline-resistant colorants with water-based technology. When used as a primer it assists with vapor mediation. As a top-coat, it is highly durable and ideal for industrial and commercial high traffic applications.

- FADE RESISTANT COLORANTS
- PRIMER & TOP COAT
- LOW VOC & LOW ODOR

# BENEFITS

---

## UNPARALLELED PIGMENT TECHNOLOGY

Utilizing the latest synthetic pigments designed for optimal performance on cement-based surfaces. These highly refined pigments resist the harsh deterioration from the PH and alkalinity, delivering the best fade and UV resistance.

## UNCOMPROMISED ADHESION

When used as a primer, the low-viscosity allows the ColorTec 600WB to saturate the pores of the concrete, reducing vapor transmission. Adhesion promoters ensure the concrete fails before the coating.

## COST EFFECTIVE PROTECTION

Delivering exceptional performance in demanding environment's, this colored topcoat will withstand repetitive abuse to wear and scratching, lowering maintenance costs.
