SAFETY DATA SHEET

SECTION 1 Product and Company Identification

Product
Product Name: MicroTek One Coat
Product Description: Thin Concrete Overlay Micro Topping Smooth Tight Troweled
Intended Use: Decorative, tight trowel resurfacing

Company
Manufacturer: SureCrete Design Products, Inc.
15246 Citrus Country Drive
Dade City, FL 33523
USA
Contact: 1-352-567-7973 (telephone general)
1-800-262-8200 Chemtrec
+1 703-741-5500 Chemtrec International
info@surecretedesign.com (e-mail)
1-352-521-0973 (facsimile)

SECTION 2 Hazards Identification

Classification of substance or mixture:

GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)

- Skin corrosion/irritation: Category 1  H314
- Skin sensitization: Category 1  H317
- Serious eye damage/eye irritation: Category 1  H318
- Specific target organ toxicity (single exposure): Category 3  H335
  respiratory irritation
- Carcinogenicity: Category 1A  H350

GHS Label Elements:
Hazard Symbol:

![Hazard Symbol]

Signal Word: Danger

Label Hazard Statements:
- H314  Causes severe skin burns and eye damage.
- H317  May cause allergic skin reaction.
- H318  Causes serious eye damage.
- H335  May cause respiratory irritation.
- H350  May cause cancer through repeated inhalation.
- H372  Causes damage to respiratory system through prolonged and repeated exposure.
**Label Precautionary statements:**

- **P201** Obtain special instructions before use.
- **P202** Do not handle until all safety precautions have been read and understood.
- **P260** Do not breathe dust.
- **P264** Wash thoroughly after handling this product.
- **P270** Do not eat, drink or smoke while handling this product.
- **P271** Use only outdoors or in a well ventilated area.
- **P280** Wear eye protection, protective clothing, protective gloves.
- **P284** Wear respiratory protection.
- **P301+330+331** IF SWALLOWED Rinse mouth. DO NOT induce vomiting. Immediately call poison center/physician.
- **P303+361+353** IF ON SKIN (or hair) Immediately take off all contaminated clothing. Rinse skin with water/shower. Immediately call poison center/physician. Wash contaminated clothing before reuse.
- **P304+P340** IF INHALED Remove victim to fresh air and in a position comfortable for breathing.
- **P342+P313** If experiencing respiratory symptoms: Get medical attention.
- **P305+P351+P338** IF IN EYES Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing.
- **P337+P310** If eye irritation persists: Immediately call a POISON CENTER/doctor.
- **P333+313** If skin irritation or a rash occurs: Get medical attention.
- **P363** Wash contaminated clothing before reuse.
- **P501** Dispose of contents/container to an approved waste disposal plant.

**Other hazards which do not result in classification or are not covered by the GHS:** May form combustible dust concentrations in the air.

SECTION 4 First Aid Measures

**Eye Contact:** Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 20 minutes. Chemical burns must be treated promptly by a physician.

**Skin Contact:** Get medical attention immediately. Heavy exposure to portland cement dust, wet concrete or associated water requires prompt attention. Quickly remove contaminated clothing, shoes, and leather goods such as watchbands and belts. Quickly and gently blot or brush away excess portland cement. Immediately wash thoroughly with luke-warm, gently flowing water and non-abrasive pH neutral soap. Seek medical attention for rashes, burns, irritation, dermatitis and prolonged unprotected exposures to wet cement, cement mixtures or liquids from wet cement. Burns should be treated as caustic burns. Portland cement causes skin burns with little warning. Discomfort or pain cannot be relied upon to alert a person to a serious injury. You may not feel pain or the severity of the burn until hours after the exposure. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure.

**Inhalation:** Seek medical help if coughing or other symptoms persist. Inhalation of large amounts of portland cement requires immediate medical attention. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If the individual is not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

**Ingestion:** Get medical attention immediately. Call a poison center or physician. Have victim rinse mouth thoroughly with water. DO NOT INDUCE VOMITING unless directed to do so by medical personnel. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Have victim drink 60 to 240 mL (2 to 8 oz.) of water. Stop giving water if the exposed person feels sick as vomiting may be dangerous. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

**Most important symptoms and effects, both acute and delayed:**
- **Eye contact:** causes serious eye damage.
- **Inhalation:** may cause respiratory irritation.
- **Skin contact:** causes severe burns. May cause an allergic skin reaction.
- **Ingestion:** may cause burns to mouth, throat and stomach.

**Over-exposure signs/symptoms:**
- **Eye contact:** pain, watering and redness.
- **Inhalation:** respiratory tract irritation and coughing.
- **Skin contact:** pain or irritation, redness and blistering may occur, skin burns, ulceration and necrosis may occur.
- **Ingestion:** stomach pains.
Potential chronic health effects:
Long-term exposure to high concentrations of crystalline silica quartz may cause cancer. Long-term exposure to high concentrations of dust containing iron oxide can cause a benign condition termed “pulmonary siderosis.” This condition is not associated with any physical impairment of lung function.

Note to physician: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

SECTION 5 Fire Fighting Measures
Extinguishing Media: Water spray, alcohol resistant foam, Dry Chemical or CO2 appropriate for surrounding materials.

Special Hazards: Burning produces noxious and toxic fumes. Oxides of carbon.

Unusual Fire and Explosion Hazard: Dust may form explosive mixture with air. Electrostatic charging is possible.

Advice for firefighters: Wear self-contained breathing apparatus for firefighting if necessary.

Further information: Use water spray to cool unopened containers.

SECTION 6 Accidental Release Measures
Personal precautions: Avoid dust generation. Eliminate all sources of ignition. Keep unnecessary and unprotected personnel away from spill. Do not touch or walk through spilled material. Put on appropriate protective equipment.

Environmental precautions: Avoid dispersal of spilled material and runoff from contact with soil, waterways, drains and sewers.

Methods for clean-up: Dry spills may be scooped up. Attempt to prevent dry product (dust) from becoming airborne. Wet product may be scraped up and placed in appropriate disposal containers. Allow wet product to dry before disposal. Do not flush down drains.

SECTION 7 Handling and Storage
Handling: Avoid contact with eyes, skin, and clothing. Promptly remove dusty clothing or clothing that has become wet with the mixed product. Launder clothing before reuse. Wash thoroughly after exposure to product. Avoid formation of dust - dust may form explosive mixture with air. Avoid dust deposit, remove dust regularly. Take precautionary measures against electrostatic charging. Keep away from open flames, heat and sparks.

Conditions of safe storage, including any incompatibilities: Store product in a cool, dry, ventilated area. Prevent against physical damage and moisture. Normal temperatures and pressures do not affect the material. Wet portland cement is alkaline. As such it is incompatible with acids, ammonium salts and aluminum metal. Wet portland cement can cause severe chemical burns; do not get inside clothing, boots, shoes, or gloves.
## SECTION 8 Exposure Control / Personal Protection

### Exposure Controls

Appropriate engineering controls: Use mechanical ventilation (dilution and local exhaust) to control exposure within applicable limits. Avoid actions that cause dust to become airborne.

### Personal Protective Equipment
**Eye/face protection:** To prevent eye contact, wear safety glasses with side shields, safety goggles or face shields when handling dust or wet cement. Wearing contact lenses when working with cement is not recommended.

**Skin protection:** Wear impervious clothing to eliminate skin contact. Where needed wear boots that are impervious to water to eliminate foot and ankle exposure. If clothing becomes saturated with wet concrete, it should be removed and replaced with dry clothing. Wear impervious gloves to eliminate skin contact. Do not rely on barrier creams. Periodically wash areas contacted by wet cement or its dry ingredients with pH neutral soap and water. Wash again at the end of work.

**Respiratory protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use and maintenance must be accordance with regulatory requirements.

**Hygiene Measures:** Handle in accordance with good industrial hygiene and safety practice. Clean water should always be readily available for skin and (emergency) eye washing. Periodically wash areas contacted by portland cement with a pH neutral soap and clean, uncontaminated water. If clothing becomes saturated with portland cement, garments should be removed and replaced with clean, dry clothing.

**Control of environmental exposure:** Prevent further leakage or spillage if safe to do so. Do not let product enter drains or waterways. Discharge into the environment must be avoided.

**Potential environmental effects:** Not considered to be harmful to aquatic life.

### SECTION 9 Physical and Chemical Properties

#### General
- Physical state: powder
- Color: varies by selection
- Odor: no distinct odor
- Odor Threshold: Not available

#### Safety Data
- pH in water: >11.5
- Melting point: Not available
- Boiling point: Not available
- Flash point: Not available
- Freeze Point: Not available
- Evaporation rate: Not applicable
- Vapor pressure (mm Hg.): Not applicable
- Water solubility: 0.1 – 1%
- Vapor density (air = 1): Not applicable
- Relative density: 2.65

### SECTION 10 Stability and Reactivity

**Reactivity:** Reacts slowly with water forming hydrated compounds, releasing heat and producing a strong alkaline solution until reaction is substantially complete.

**Chemical stability:** Stable under normal storage conditions.
**Possibility of Hazardous reactions:** None under normal conditions of storage and use.

**Conditions to avoid:** No specific data.

**Incompatible materials:** Oxidizing materials, acids, aluminum and ammonium salt. Portland cement is highly alkaline and will react with acids to produce a violent, heat-generating reaction. Toxic gases or vapors may be given off depending on the acid involved. Reacts with acids, aluminum metals and ammonium salts. Aluminum powder and other alkali and alkaline earth elements will react in wet mortar or concrete, liberating hydrogen gas. Limestone ignites on contact with fluorine and is incompatible with acids, alum, ammonium salts, and magnesium. Silica reacts violently with powerful oxidizing agents such as fluorine, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen difluoride yielding possible fire and/or explosions. Silicates dissolve readily in hydrofluoric acid producing a corrosive gas — silicon tetrafluoride.

**Hazardous decomposition products:** Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### SECTION 11 Toxicological Information

#### Component Information

</table>

**Sensitization:** Does not cause sensitization.

**Mutagenicity:** No data available.
**Carcinogenicity:** This product contains greater than 0.1% crystalline silica which is listed as a Group 1 carcinogen by IARC, a known carcinogen by NTP, OSHA and as A2 suspected human carcinogen by ACGIH.

**Reproductive toxicity:** No data available.

**Specific target organ toxicity- single exposure:** None.

**Specific target organ toxicity- repeated exposure:** Crystalline silica, quartz targets respiratory tract and kidneys (Category 1).

**Aspiration Hazard:** No data available.
